

EHMS & EHV Overview

Agenda

- Review EHMS
 - Viewing current equipment status
 - Viewing equipment history
- Review EHV
 - Equipment status from multiple applications
 - Reporting repairs and inspections
 - Associating component ID (CID)
 - Fleet Stats

EHMS Overview

- EHMS contains alert and repair information for Field Manual of the AAR Interchange Rules 36, 37, 41, 43 & 44
 - Excludes containers and trailers
- Supported by AAR Interchange Rule 94
- Provides visibility to data summaries including line of road failure (LORF) data summaries
- Access to calibration records
 - Detector owners have access to upload
- Managed by Equipment Health Management Committee (EHMC)

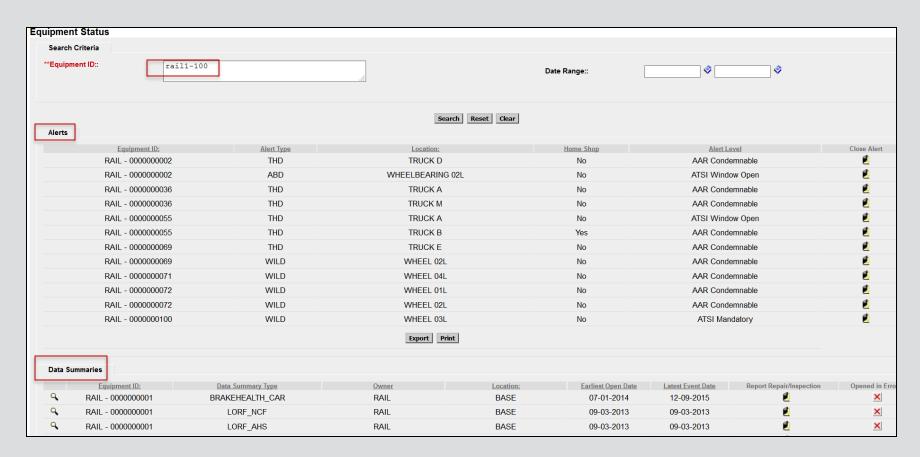

EHMS Equipment Status

- Equipment Status screen provides access to:
 - Open alerts
 - Open data summaries
- Preferred option when searching for open alerts or data summaries
- Displays up to 1,000 rows of data on screen

Equipment Status Query Results

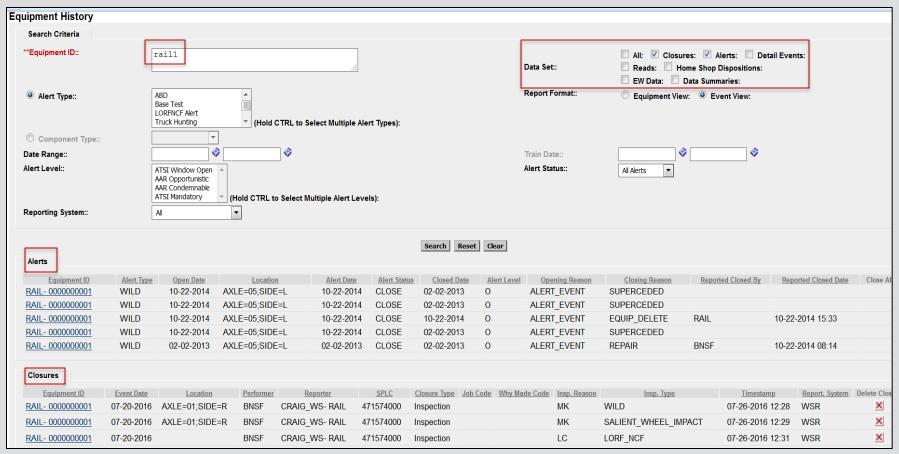

EHMS Equipment History

- Equipment History screen provides access to:
 - Open and closed alerts
 - Open and closed data summaries
 - Repairs and closures
 - Including Reporter/Performer and Job Code
 - Visible to Umler interested parties (stencil mark owner, Umler owner, lessee, maintenance responsible party)
- Additional options include Early Warning information

Equipment History Query Results

EQUIPMENT HEALTH VIEW OVERVIEW

Equipment Health View Overview

- EHV was implemented in early 2012, accessible via EHMS
 - Became stand-alone application in September 2016
 - Access via EHMS will be removed in 2017
- Consolidates health related information from Equipment Health Management System (EHMS), Umler, Early Warning (EW) and Damage Defective Car Tracking (DDCT)
- Proper application permissions required for each application to view or to report repairs/inspections
- Adheres to AAR Interchange Rules and other industry guidelines

Equipment Health View Overview

- EHV utilizes dashboard with Asset information such as:
 - Umler inspections, EHMS alerts and data summaries, Early
 Warning letter information, Association of Component ID (CID)
 - High-level DDCT info to Handing Carrier, Car Owner and/or shop involved with the incident (party to the incident)
 - Equipment location, mileage and Fleet Stats to car owners
 - Must have proper permissions for source applications
- Fleet Stats support car owners visibility to Asset info
 - Available only to car owners
 - Downloads where the equipment count exceeds 200 cars incur charges as defined in Railinc's Price List

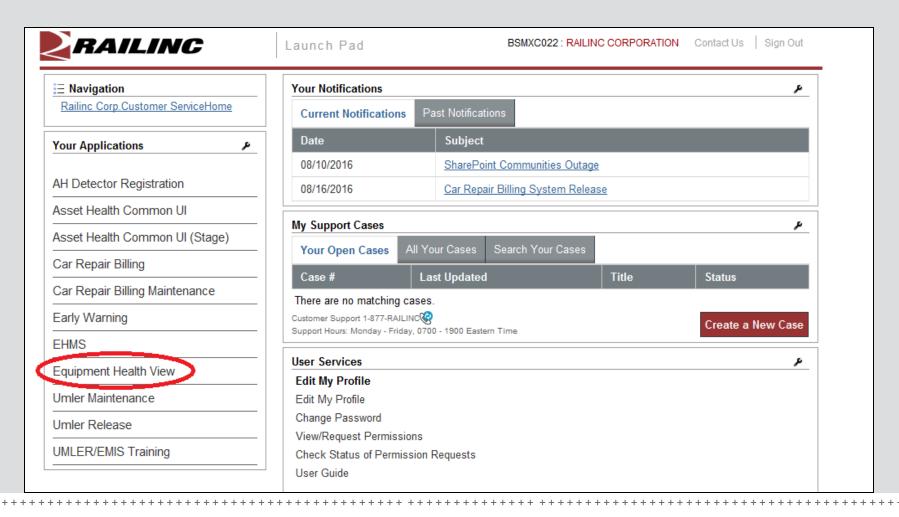

Permissions Required for EHV

- EHV interfaces with several Railinc applications and proper access is required
- You will need:
 - EHV Access
 - ✓ EHV Generic Access
 - ✓ EHV Fleet Stats required for Fleet Stats
 - ✓ EHV Billed Party required for downloading more than 200 cars
 - Umler- view high-level equipment info and inspections such Air Brake Test due dates
 - ✓ Umler Inspection Rights
 - EHMS- view alerts and report repairs and inspections as well as Data Summaries
 - ✓ EHMS Generic and Car Repair History
 - Early Warning- displays when car is on MA or EW letter
 - ✓ EW Report inspection rights
 - DDCT- view high-level info that incident exists to parties of incident
 - ✓ Must have appropriate DDCT permissions.
 - Must be car owner to view Mileage or Equipment location
 - Must be party to the incident for DDCT

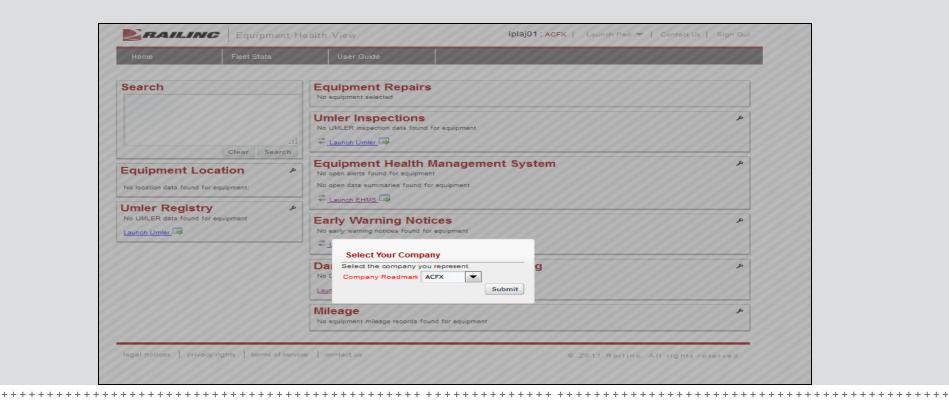

Access to EHV

Access to EHV

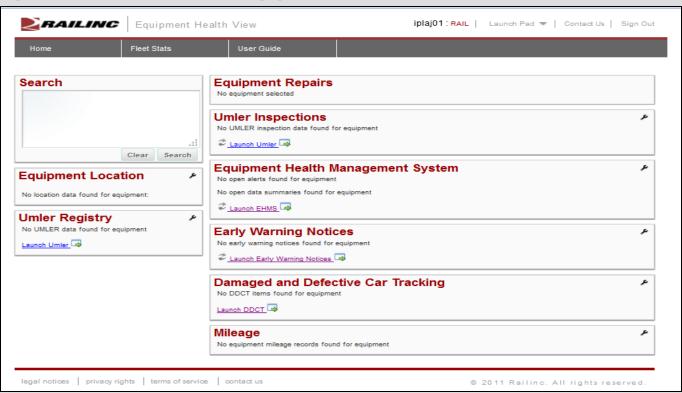

Select mark from 'Select Your Company'

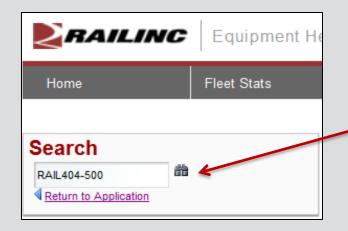

EHV Dashboard

 Must have EHV permission and other required permissions for applications

Searching Equipment

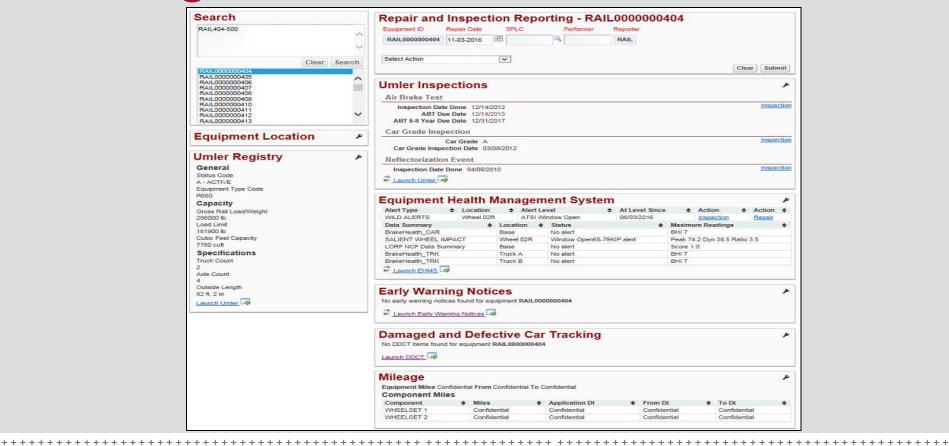

- Allows search by single equipment
 - Ability to search range of equipment up to 200 equipment IDs
- Displays equipment IDsin numerical order
- Select equipment ID to view Asset information such as Umler, EHMS or Early Warning info

Viewing Health Data

Viewing Equipment Location

Equipment Location

Loc: LAUREL, MT

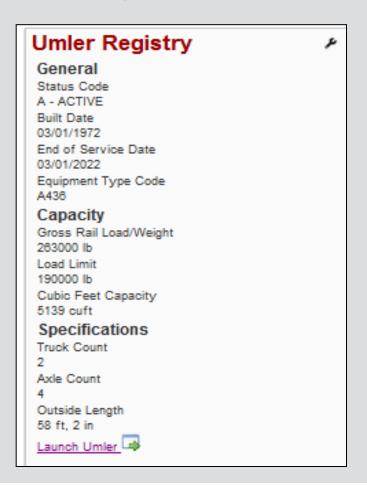

Last Move: 07/01/2016 02:31 (Empty)

STCC: 2432158 - PLYWOOD

- Displays location city/state, last move information and/or STCC when available
- Available to car owner or party to the waybill

Viewing Equipment Information

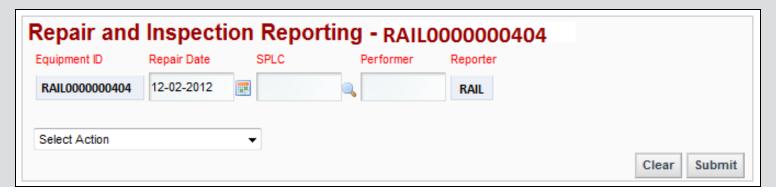

- Displays high level Umler info such as:
 - ✓ Equipment Type Code
 - ✓ Status Code
 - ✓ Equipment specifications such as truck and axle counts are shown
- Ability to access Umler using 'Launch Umler' link to view all details

Reporting Repairs and Inspections

- Ability to report repairs or inspections for Umler, EHMS or Early Warning
 - Use 'Select Action' dropdown to select
- Report Component ID (CID) associations
- Submit multiple actions at one time
 - Add completed repairs or inspections using 'Select Action',
 'Repair' or 'Inspection' links

Viewing Umler Inspections

- Displays reported inspections including dates and details for each inspection (due dates, date done, etc.)
- Use 'Inspection' link to report inspection
- Access Umler using 'Launch Umler' link

Viewing EHMS Alerts and Data Summaries

- Displays open EHMS alert and data summaries information
- Use 'Inspection' or 'Repair' link to report repair or inspection
- Access EHMS using 'Launch EHMS' link

Equipment Health Management System									عر

Launch EHMS	•												

Viewing Early Warning

- Displays open Early Warning and Maintenance Advisories including Notice type and number, Severity Code, Effective/Expiration Date
 - ✓ Defined Early Warning Notices must be closed by reporting information to Umler
 - ✓ DDCT incidents must be closed by reporting repair in DDCT
- Access Early Warning using 'Launch Early Warning Notices' link

Viewing DDCT

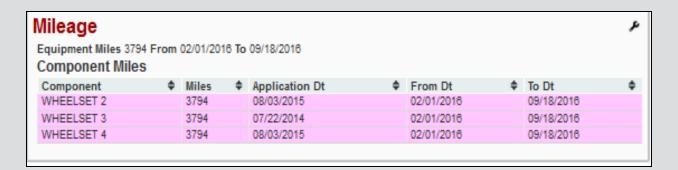

- Displays open DDCT incidents to Handling Carrier, Car Owner or Shop associated with incident (party to the incident)
 - Requires DDCT permissions
- Access DDCT using 'Launch DDCT' link

Damaged and Defective Car Tracking									عر	
Incident ID	ф	Incident Date	ф	Originating Road	Car Mark Owner	Interchange Rule	Defect	ф	Status	ф

Launch DDCT	3									

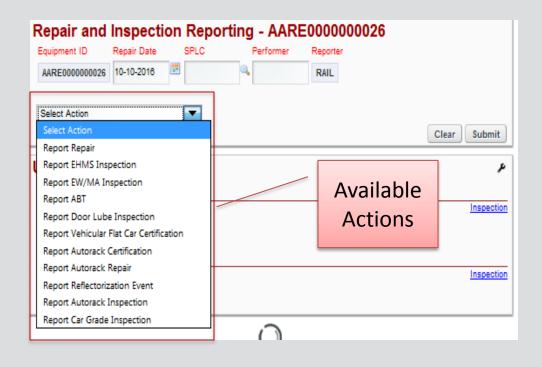

Viewing Mileage

- Uses car movement events to calculate equipment mileage
 - Data available starting January 2010 to present
 - From/To date showing first move to most recent movement
- Only visible to car owner

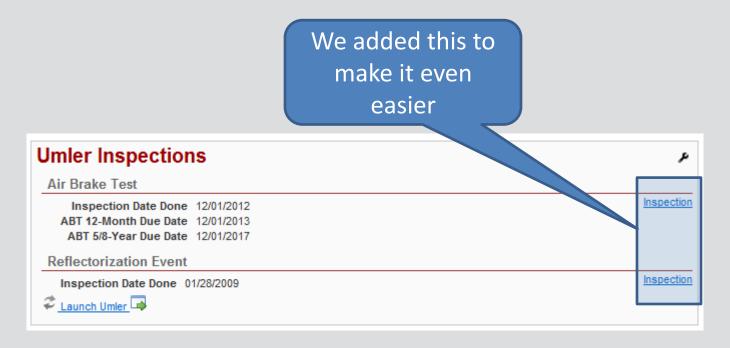

Reporting Repairs and Inspections

- Ability to use 'Select Action', 'Repair' or 'Inspection' links
- Multiple selections at one time

EHV Repairs & Inspections

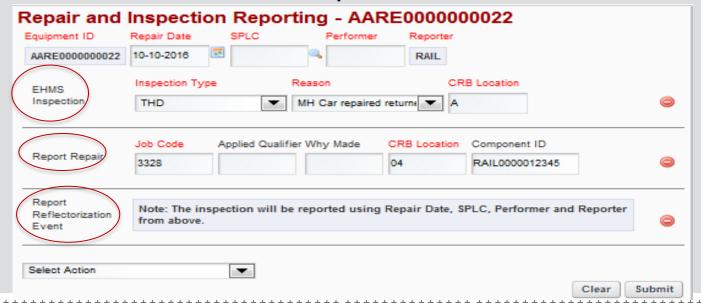

Reporting Multiple Actions

 Select appropriate repairs, inspections or associations to report

- Required fields are in red
- Click 'Submit' when complete

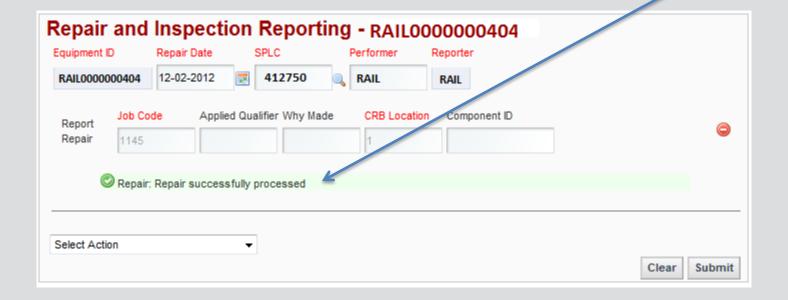

EHV Repairs & Inspections

Not all repairs go to EHMS or Umler Component Registry (CEPM). Some are just stored in the database.

Repair was saved to database but did not go to EHMS/CEPM

- EHV Fleet Stats provide visibility to car owner to view:
 - Aggregate Railinc data, at the fleet level, for all owned equipment
 - This data can be used to help understand the overall health at a fleet level
 - High level stats based on Railinc data
 - Visible only to the car owner (must have appropriate permissions to Fleet Stats)
 - The Fleet Stats screen has following note on data:
 - Important note: The data contained on this screen is served by a data warehouse that is updated nightly. Changes will occur throughout the day. The report is intended to be used as a fleet-level tool and not for making individual equipment decisions.

Data Available in EHV Fleet Stats

- EHV Fleet Stats contain information related to Asset Health information
- The report contains the following information for the car owner:
 - Counts by Umler Equipment Status
 - Counts by Mark for those that own more than one Mark
 - Counts by Umler Equipment Groups
 - Counts by EHMS Alert Type
 - Counts by EW and MA
 - Counts by DDCT Rule Number
 - Umler Inspections Past Due
 - Equipment Restricted from Interchange

EHV Fleet Stats Permissions

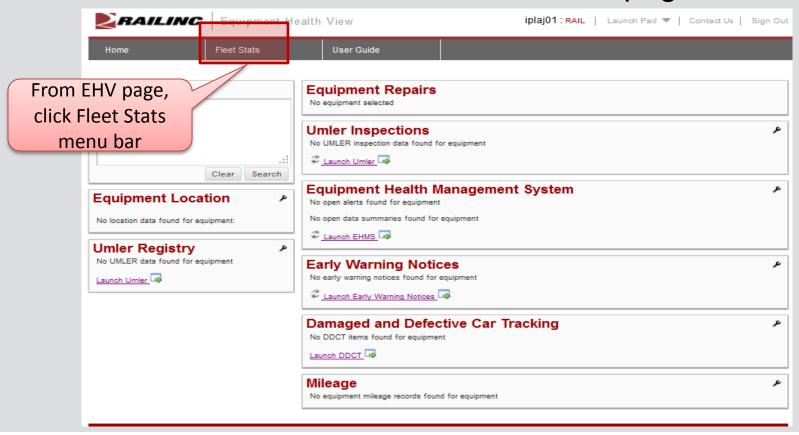

- In addition to EHV Generic Access, car owners must have:
 - EHV Fleet Stats permission- required to view high level and detail info on fleet
 - ✓ User may request visibility to fleet for Company Id(s)/Mark(s)
 - EHV Billed Party permission- required to download reports that exceed equipment count of 200 cars
 - ✓ Downloads allowed for reports less than equipment count of 200 cars
 - ✓ A pop-up will display advising if download will incur fee
 - ✓ Only one EHV Billed Party permission allowed per user ID.

	EHV Billed Party (company required) Company mark used to invoice for downloaded EHV Fleet Stats exports. This mark will be used for invoicing and is required for downloading exported data.
	EHV Fleet Stats (company required) Allows access to EHV Fleet Stats for specified company
* Company Id	Search

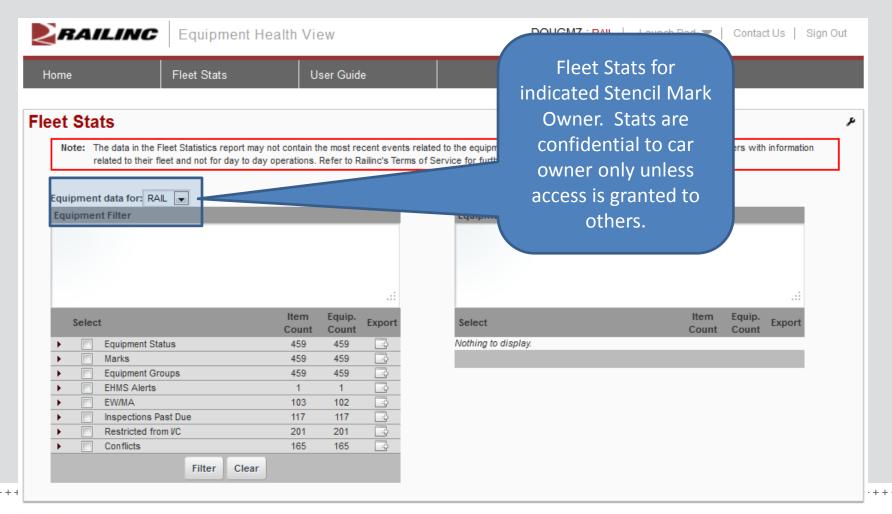

Accessing EHV Fleet Stats

Access to Fleet Stats is located on EHV page

Please refer to prior note regarding the use of a data warehouse

t Stats

By clicking the "Export" icon you will be able to download a CSV file listing the equipment counted on a the line

How do I see the actual equipment?
