Learning about Loading Authority (OT-57)

The Loading Authority (OT-57) system is a web-based application for creating fleets and viewing contact and storage location information.

This document describes how to use the Loading Authority (OT-57) system through the following major sections:

- <u>Overview</u> provides basic information about the system
- <u>Getting Started</u> describes how to access and log into the system

Fleet managers have the ability to create and manage fleets. Fleets are created and managed to register private equipment per <u>Circular OT-57</u> with controlling entities and with equipment contact information and storage locations. Fleet information provides railroads with the needed contact and empty destination information for private equipment. By providing valid contact and storage information in the fleet information section, private rail equipment can be effectively managed when traveling on a railroad's line.

- <u>Creating Fleets</u> describes how to create a fleet
- <u>Managing Fleets</u> describes all the functions available for managing a fleet
- Equipment Search describes how to query an equipment search
- <u>Requesting Disposition</u> describes how to request dispositions
- <u>Managing Disposition Requests</u> describes how to manage disposition requests
- Managing Transfer Requests describes how to manage transfer requests
- <u>Managing Locations</u> describes how to manage locations
- <u>Glossary</u> and <u>Index</u>

To access Loading Authority (OT-57) documentation (i.e., this user guide) at any time, select the **Documentation** menu item from the application menu.

Overview

The Loading Authority OT-57 system provides a centralized, paperless process for the registration of private freight rail equipment. It is a web-based communication system that facilitates the communication between railroads and controlling entities. Private rail equipment must be registered in the Loading Authority OT-57 system with a valid controlling entity contact and storage location information. Refer to the *Association of American Railroads Circular OT-57 for Rules Governing Registration of Private Cars and Controlling Entity Contact & Storage Information* for more information.

The Loading Authority OT-57 system enables private equipment owners, lessees, and shippers to create Loading Authority OT-57 fleets and enables railroads to view contact and storage location information. In addition, the Loading Authority OT-57 system supports data integrity by receiving automated updates from Railinc's Customer Identification File (CIF), the Centralized Station Master (CSM), and Umler[®].

The use of a secure and confidential Loading Authority OT-57 database assists all parties in a collaborative effort to ensure needs are met while protecting the railroads' network. By leveraging other applications such as Umler and FindUs.Rail, the Loading Authority OT-57 system offers both railroads and car owners/shippers the ability to accurately define equipment subject to Loading Authority OT-57 and provides a ready means to move empty equipment to an authorized storage location.

The Loading Authority OT-57 system makes use of the Railinc Industry Reference Files (IRF) and the data in Umler to validate that the equipment added to the system is registered and that there are no critical errors associated with the registration.

General Business Rules

The following general business rules apply to Loading Authority OT-57:

- Equipment Owners, Lessees, Shippers, and approved agents/third parties may have access to create a Loading Authority OT-57 Fleet. Single Sign-On rights must be granted that allow access to the Loading Authority OT-57 system.
- A freight car may only be on one active Loading Authority OT-57 fleet at a time.
- A Loading Authority OT-57 fleet has a maximum limit of 50,000 pieces of equipment.
- Information listed in a fleet must be valid; the Railinc Industry Reference Files are used for validation.
- A Loading Authority OT-57 fleet does not expire.
- A fleet manager can manually delete a fleet or remove equipment from fleets.
- Railroads are only able to view equipment in their company's possession.
- Equipment Owners are able to view and remove equipment from any fleet where they are the stenciled mark owner.
- Controlling Entity contact information is maintained in the FindUs.Rail application.

System Interface Notes

The following system interface notes apply to the Loading Authority OT-57 System:

- All sections and fields marked with an asterisk * are mandatory. Items that do not have an entry box next to them are display only and are populated as the mandatory data is entered.
- Certain fields have a corresponding magnifying glass icon **Q**. You can select the magnifying glass to search for valid data for the corresponding field. Industry Reference File data lookups also use (*) wildcarding to assist users in looking up data.
- The system is available 24/7 except for scheduled maintenance.

System Requirements

For information about the system requirements of Railinc web applications and for information about downloading compatible web browsers and file viewers, refer to the *Railinc UI Dictionary*.

Accessing the Railinc Customer Success Center

The Railinc Customer Success Center provides reliable, timely, and high-level support for Railinc customers. Representatives are available to answer calls and respond to emails from 7:00 a.m. to 7:00 p.m. Eastern time, Monday through Friday, and provide on-call support via pager for all other hours to ensure support 24 hours a day, 7 days a week. Contact us toll-free by phone at 877-RAILINC (1-877-724-5462) or send an email directly to csc@railinc.com.

Getting Started

Loading Authority OT-57 uses Railinc Single Sign-On (SSO) which is accessed from the Railinc portal at <u>https://public.railinc.com</u>. Select the **Customer Login** link in the upper right corner of the page. Then, follow these steps:

- If you do not already have a Railinc SSO user ID and password, refer to the <u>Railinc</u> <u>Single Sign-On User Guide</u>. Once you have access to Railinc SSO, you must request access to Loading Authority (OT-57) within SSO.
- 2. If you are a controlling entity who will be creating fleets in the Loading Authority (OT-57) application, you need to be setup in the FindUs.Rail database with your email and phone number contact information. Within FindUs.Rail, there is a Loading Authority (OT-57) controlling entity contact type. If this contact information is not setup, then your controlling entity contact information will not be available for selection when your company's fleets are created. If you are not already registered in the FindUs.Rail contact database, go to https://public.railinc.com. to request permission after establishing your SSO account. See <u>Appendix A. Adding OT-57 Contacts to FindUs.Rail</u> for additional information. Refer to the *FindUs.Rail User Guide* for complete instructions on using the FindUs.Rail system.
- If you do not have access to the Loading Authority (OT-57) application, request access to Loading Authority (OT-57) by following instructions in the <u>Railinc Single Sign-On User</u> <u>Guide</u>. See <u>User Roles</u> for information about the available levels of access. When you have received e-mail notification confirming your access to Loading Authority (OT-57), you can log on and begin using Loading Authority (OT-57).

User Roles

Your assigned user role determines the functions you can perform. User roles are assigned by Railinc through the SSO interface, which is described in the <u>Railinc Single Sign-On User Guide</u>.

- Equipment Owner Allows Equipment Owners to remove equipment from fleets. See Equipment Search.
- Fleet Manager Allows Fleet Managers to create and manage fleets, manage locations and search equipment.
- **Railroad User** Allows Railroad Users to search controlling entity and storage information for equipment. See <u>Equipment Search</u>. When a Railroad User also manages fleets, the user must have Fleet Manager permissions under a different mark than the railroad mark.

Logging In

To log into Loading Authority (OT-57):

- 1. Open your internet browser.
- 2. Enter the following URL: <u>https://public.railinc.com/</u>. Select the **Customer Login** link in the upper right corner of the page.
- 3. In the Account Access panel, enter your User ID and Password. Select **Sign In**. The Railinc Launch Pad is displayed.
- 4. In the **My Applications** section, select **Loading Authority (OT-57)**. The Loading Authority (OT-57) Dashboard page is displayed. The sections that appear in the Dashboard are dependent on your user role (User Roles). Users with the Equipment Owner and Fleet Manager roles will see the sections that are pictured below.

Exhibit 2. Dashboard – Equipment Owner and Fleet Manager

Managing Multiple Companies

Some Loading Authority (OT-57) users, especially those who work for larger agencies, manage more than one company.

If you manage one company, your company is automatically selected – you do not need to select a company to manage – and the Loading Authority (OT-57) System Dashboard page appears when you log in (see <u>The Dashboard</u>).

After you have been successfully set up in Railinc's SSO with the appropriate Loading Authority role assigned, you can then manage more than one company. To do this, at login you must first select the company that you want to manage. If you're involved with a single company, you can

request access based on your role. If you're involved with more than one company, you can request access based on your specific role for each company for which you provide services.

Note: After selecting a listed company, you can only see and manage information for that selected entity until you select another company.

When managing more than one company, use the following procedure to select the company that you want to manage when you login:

1. Log into Loading Authority (OT-57). The User Mark Selection pop-up box is displayed (Exhibit 3).

Exhibit 3. Select a Mark/Company ID

Select a N	1ark		
RAIL		-	

- 2. Select the Mark/Company ID from the drop-down list that you want to manage.
- 3. Select **Ok**. The Dashboard for the selected company is displayed allowing you to manage that company.

Exhibit 4. Dashboard for Selected Company

	Register	ed Equipment			8,120					
	Active o	n a Fleet			0					
	Not Act	ive on a Fleet			8,120					

Change the company that you are managing at any time while using Loading Authority (OT-57). Simply select the company link as indicated in Exhibit 4 and choose another company.

The Dashboard

The Loading Authority (OT-57) Dashboard is displayed on the Home page immediately following a successful login to the system. From here you can perform system functions by selecting the application menu items. The Dashboard (<u>Exhibit 2</u>) may appear different, depending on your role. Return to the Dashboard at any time by selecting the **Home** menu item. The Dashboard provides the following sections of data:

• Equipment Owners View for <u>equipment owners</u>:

- **Registered/Preregistered Equipment Statistics** provides a summary of registered/preregistered equipment statistics. The number of registered and preregistered equipment are from the Umler system for the stenciled mark, along with the active/non-active equipment on a fleet in Loading Authority. Select a number in this section to view the details in the Equipment Search as shown in <u>Exhibit 5</u>.
- **Conflicts** provides a summary of your company's equipment registration conflicts. Select a number in this section to view the details in the Equipment Search, similar to Exhibit 5.
- Fleet for <u>fleet managers and equipment owners</u>:
 - Fleet Information provides a summary of your company's active, valid fleets and associated information.
 - **Conflicts** provides a summary of your company's equipment registration conflicts related to fleets.
- Equipment Requests for <u>all roles</u>:
 - **Disposition Requests** provides a summary of equipment disposition requests by status and role.
 - **Transfer Requests/Pending Timeline** provides a summary of equipment transfer requests by status and role and pending timeline by number of days for submitted and incoming requests.

Fleets

Fleet managers have the ability to create and manage fleets. Fleets are created and managed to register private equipment per <u>Circular OT-57</u> with controlling entities and with equipment contact information and storage locations. Fleet information provides railroads with the needed contact and empty destination information for private equipment. By providing valid contact and storage information in the fleet information section, private rail equipment can be effectively managed when traveling on a railroad's line.

Creating Fleets

Four components are required to complete a fleet in a new Loading Authority: Fleet Name, Controlling Entity Contacts, Storage Location(s) and Equipment ID(s).

1. From the Home page, select **Fleet** > **Create Fleet** from the menu bar. The Create Fleet page is displayed.

Exhibit 6. Create Fleet

- 2. Complete the following fields (required are marked with an asterisk (*):
 - a. Fleet Name
 - b. Fleet Description (optional)

- c. Controlling Entities designate primary and secondary contacts. These are the contacts to be called with questions about routing the cars. Enter a Mark or Company ID to pull in controlling entities. If you do not see the contacts you're looking for visit <u>FindUs.Rail</u>.
 - Select a primary contact by clicking a radio button.
 - Select one or more optional secondary contacts by highlighting the rows (optional).
- d. **Storage Locations** designate primary and secondary locations for the cars. If you don't see the location you're looking for, see <u>Managing Locations</u>.
 - Select a primary location by clicking a radio button.
 - Select one or more optional secondary locations by highlighting the rows (optional).
- 3. Alternate Empty Waybill Instructions this section will be available in a future phase.
- 4. When all required fields have been entered, the **Save & Continue** button becomes available to select. Select **Save & Continue**. See <u>Adding Equipment to a Fleet</u> to continue.

Managing Fleets

Manage a fleet by selecting **Fleet > Manage Fleets** from the menu bar. Select the fleet name.

Manage	Fleets						
Clear Filter	Number of fleets: 29					+	Create Fleet
Fleet Id	Fleet	Company	Primary Contact	Storage Location	Number of Equipment	Fleet Status	
482	ADMX	ADM TRANSPORTATION COMPANY		PRIMARY	26756	First Warning

9555	Testing Suspension1			PRIMARY	4	Suspended	

Warning Status

Fleets in the **First Warning**, **Second Warning** or **Third Warning** status are in danger of suspension. When you select the fleet from the **Manage Fleets** table, the full details of the fleet are displayed, including the number of days until suspension:

- First Warning means the fleet will be suspended in 30-15 days.
- Second Warning means the fleet will be suspended in 14-8 days.
- Third Warning means the fleet will be suspended in 7 or less days.

Exhibit 8. Fleet Needs Verification

Scroll to the bottom and select the **Confirm Fleet** button to confirm that you have verified the fleet. Selecting this button confirms verification, activates the fleet for another 11 months and updates the **Last Verified** date to the current date. The status is updated to **Active**.

See Editing Fleet Information and Deleting a Fleet for details on saving and deleting fleets.

Suspended Status

Fleets in **Suspended** status are no longer valid, including the equipment registered to the suspended fleets. When you select the fleet from the **Manage Fleets** table, the full details of the fleet are displayed, including the last verified date at the bottom of the page.

Exhibit 9. Fleet Suspended Due to Inactivity

This Fleet Has Been Suspended.Inactive for 12 or more months.Select the Confirm Fleet button at the bottom of the page to reactivate.

Exhibit 13. Fleet Summary Example

- 1. Equipment in Conflict this is equipment that may need to be added to Umler or may be part of another fleet or another company may have your equipment assigned to another fleet. Unless fixed, equipment in the Equipment in Conflict sections will not be saved to your fleet. Only equipment that appears in the Equipment Listing section will be saved to your fleet.
 - a. Equipment not in Umler
 - As needed, update your equipment in Umler and then select the blue refresh icon for an update of the list.
 - Select the red trash icon to remove conflicts in this section.

b. Equipment on another fleet

- As needed, transfer equipment back to your company by contacting the equipment owner and then select the blue refresh icon for an update of the list.
- To transfer equipment that is part of another fleet to your fleet, select the green transfer button to initiate the transfer request. For details, see <u>Requesting</u> <u>Equipment Transfer</u>.
- Select the red trash icon to remove conflicts in this section.

c. Equipment already assigned

- Select equipment to move them from another fleet to the current fleet and then select the blue arrow icon.
- Select equipment and the red trash icon to remove equipment in this section.

2. Equipment Listing

- Equipment appearing in this section has no conflicts and will be automatically saved to the fleet.
- 3. Add Equipment button: Select this button to <u>Adding</u> Equipment to a Fleet.
- 4. **Remove Equipment** button: Select this button to the <u>Removing Equipment</u>.
- 5. Replace All Equipment button: Select this button to <u>Replacing All</u> Equipment.
- 6. **Download Equipment CSV** button: Select this button to download the list appearing in Equipment Listing. The list of equipment initials and numbers can be saved as a .csv file.
- 7. **Delete Fleet** button: Select this button to <u>Deleting a Fleet</u>.
- 8. Save Fleet button: When updates are made to the Fleet Name, Fleet Description, Controlling Entities and/or Storage Locations, select the Save Fleet button to save your updates. For Equipment in Conflict sections, Loading Authority automatically saves any updates to these lists.

Editing Fleet Information

When one or more updates are made to the Fleet Name, Fleet Description, Controlling Entities and/or Storage Locations, select the Save Fleet button to save your updates.

- 1. Update any of the following fields (required are marked with an asterisk (*):
 - a. Fleet Name
 - b. Fleet Description (optional)
 - c. Controlling Entities designate primary and secondary contacts. These are the contacts to be called with questions about the cars. Enter a Mark or Company ID to pull in controlling entities. If you do not see the contacts you're looking for visit <u>FindUs.Rail</u>.
 - Select a primary contact by clicking a radio button.
 - Select one or more optional secondary contacts by highlighting the rows (optional).
 - d. **Storage Locations** designate primary and secondary locations for the cars. If you don't see the location you're looking for, see <u>Managing Locations</u>.

- Select a primary location by clicking a radio button.
- Select one or more optional secondary locations by highlighting the rows (optional).
- 2. Alternate Empty Waybill Instructions this section will be available in a future phase.
- 3. Select Save Fleet.

- 2. Select the blue button to verify the equipment is still on another controlling entity's fleet.
- 3. Select the green transfer button to initiate the transfer request.

Exhibit 19. Equipment on Another Fleet Action Buttons

4. A success message will confirm that you have placed a transfer request and the amount of equipment selected.

Exhibit 20. Equipment Request Success Message

5. The **Equipment Requests** section of the **Home** page will be updated with the amounts of all the existing equipment requests and statuses for your MARK. The three requests submitted above are shown in the example below in the **Submitted** row under the **Pending** column.

Exhibit 21. Equipment Transfer Request on the Home Page

For more details about transfer requests, see Managing Transfer Requests.

Equipment Search

The Equipment Search allows users to search for up to 10,000 pieces of equipment.

- Equipment owners can search and download a list of equipment that they own and remove it from its current fleet.
- **Railroad users** can search and download a list of equipment that they possess and request disposition.
- Fleet managers can search equipment and download a list of equipment that is assigned to their fleets. For equipment that isn't in one of their fleets, an error message will show the information is confidential.

To search equipment:

- 1. Select Equipment Search from the main menu.
- 2. Enter equipment in the **Equipment Search** field as a range or delimited by commas or spaces.
- 3. Select **Search** to view search results or **Download** to download the search results to a .csv file.

To request disposition, see <u>Requesting Disposition</u>.

To remove equipment from its current fleet:

- 1. Select all checkboxes by selecting the checkbox at the top of the first column or select individual checkboxes for the equipment you want to remove. Once one or more checkboxes are selected, the **Actions** drop-down list appears at the top right of the table.
- 2. Select Actions and select Remove Equipment.
- 3. Select **Proceed** to confirm removing the selected equipment or **Cancel** to cancel.

Exhibit 25. Equipment History for an Equipment ID – Equipment Owners View

- 2. Select the **Download to CSV** button to download the fleet history.
- 3. Data will vary depending on your role and some information might be marked as confidential. For example, if you are an equipment owner and you do not own the car, then the information is marked as Confidential.
 - Equipment Owners can view any information for their own cars.
 - Fleet Managers can view their own fleet information.
 - Railroads can view information about cars in their possession.

Railroad Users

As a railroad user, the **Search Results** provides you with the ability to search and download equipment in your possession. When equipment is not in your possession, a message appears next to the equipment ID as pictured below. For equipment that is not assigned to a fleet, a message appears next to the equipment ID with the primary equipment owner listed in FindUs.Rail.

Requesting Disposition

When there is no billing instruction or a receiver/loader is unwilling to accept or rejects a car, railroads may choose the option of sending a private car to its storage location. This is called disposition. Railroads notify the car's controlling entity of the disposition of their car through the following process:

1. From the **Search Results**, select one or more rows by clicking inside the checkbox in the first column.

Deleting Storage Locations

Storage Locations can only be deleted when no fleets are assigned to them.

To delete an existing storage location that has a zero in the Fleets column:

- 1. Select Manage Locations from the main menu.
- 2. Select the **Edit icon** in the **Edit** column for the storage location you want to edit (<u>Exhibit</u> <u>38</u>).
- 3. Verify that you are deleting the appropriate fleet because deleting the fleet cannot be undone. Select the **Delete Location** button.
- 4. Select **Proceed** to confirm delete the fleet or **Cancel** to cancel.

Managing Requests

To manage disposition and transfer requests, you must have permission for your role (fleet manager, railroad and/or equipment owner) set up in Loading Authority (OT-57), and you must have your contact information listed in the Loading Authority (OT-57) category in FindUs.Rail. See <u>Appendix A. Adding OT-57 Contacts to FindUs.Rail</u> for details.

Managing Disposition Requests

Fleet managers, railroads and equipment owners have the ability to add comments to disposition requests. Every time a comment is added, the railroad user, fleet manager and equipment owner are notified by email. Only railroad users can close disposition requests.

To manage disposition requests for your company:

- 1. Select Manage Requests > Disposition Requests from the main menu.
- 2. Add a comment to one or more disposition requests by selecting checkboxes of one or more request in the **Suspended**, **Pending**, **Escalated** or **Final Notice** tabs.

Note: The <u>Suspended</u> tab displays records for open disposition requests that are on one of the fleet manager's suspended fleets. This tab is only available to fleet managers, prompting them to either take action to confirm the fleet or move the equipment to an active fleet.

3. Select Add Comment. In this example the railroad is adding a second comment.

Closing Disposition Requests

Only railroad users have the ability to close disposition requests.

- 1. Select Manage Requests > Disposition Requests from the main menu.
- 2. Close disposition requests by selecting the checkbox of one or more requests in the **Pending**, **Escalated** or **Final Notice** tabs.
- 3. Select Close Request (Exhibit 41).

4. The Close Request pop-up displays. Select the Resolution.

Fyhihit 46	Close	Disposition	Request
	CIUSE	Disposition	Nequest

The disposition re	quest(s) for the following equipment will be close	ed.
	CGOX003029	
elect request's resolution and provide a co lesolution * upproved	nment.	
inter your comment here		
		.:

When closing a request, the reasons you can select in the **Resolution** drop-down list are:

- Approved: Instructions have been provided and the disposition can be closed
- Cancelled: User has determined that the disposition request is no longer required
- 5. You can enter a comment (optional). Select **Submit** to close the request.
- 6. On the Home page, the dashboard shows an increase in the amount of closed Disposition Requests.

If dispositions are not closed in a timely manner, they are automatically escalated in the Loading Authority system according to the escalation process and calendar provided in <u>Circular OT-57</u>.

When the system generates closures (<u>Circular OT-57</u>), the following statuses for closure also include:

- Transferred: Equipment on the request has been transferred to another fleet
- **Time Exceeded**: Time has been exceeded based on the schedule provided in <u>Circular</u> <u>OT-57</u>
- Interchanged: Equipment on the request has been interchanged to another railroad and a new disposition has been created

Managing Transfer Requests

1. Manage transfers by selecting **Manage Requests** > **Transfer Requests** from the menu bar. The Transfer Requests | Submitted Requests page is displayed.

Exhibit 47. Verify, Resend, Escalate or Cancel Submitted Requests

- 2. From the left panel, three sections are available by selecting each. Select **Close** to close the panel.
 - a. **Submitted Requests** this is the default page and it shows your company's submitted requests. To take action on Submitted Requests in the **Pending** status, select one or more pieces of equipment first by clicking inside the checkbox of the first column. Then select an action button:
 - Select **Verify Request** to show that a request is valid and to keep it from being automatically rejected. The request moves to the **Verified** status. A Pending request is automatically <u>rejected after 180 days</u> if it has not been verified. The Pending Timeline appears on the Home page.

Pending	Timeline	
	Submitted	Incoming
0-30 Days		
31-60 Days	0	0
61-90 Days	0	0
91-180 Days	0	

- Select **Resend** to send a reminder notice to the Grantor (Fleet Manager of another fleet). The request remains in **Pending** status.
- Select **Escalate** to escalate your request to the Equipment Owner. The request moves to **Escalated** status.
- Select **Cancel Request** to cancel the request. The request moves to **Closed** status.

Exhibit 49. Approve/Reject Escalated Requests (Equipment Owners only)

- c. **Owner Management** these requests require Equipment Owner action and are available only to Equipment Owners. While Equipment Owners have the ability to approve or reject requests in **Pending** status and can see these requests before they are escalated, it is strongly recommended to allow the Fleet Manager to manage these requests. Equipment Owners are required to approve or reject requests in **Escalated** status. Select one or more pieces of equipment by clicking inside the checkbox of the first column.
 - Select **Approve** to approve the move of one or more pieces of equipment. The equipment is transferred, and the request moves to **Closed** status.
 - Select **Reject** to reject the move of one or more pieces of equipment. Rejecting one or more requests by the Equipment Owner moves the request to **Closed** status without moving the equipment.
- 3. For all sections in the previous step, three status tabs are available:
 - a. **Pending** these require Grantor action.
 - b. Escalated these requests require Equipment Owner action
 - c. Closed these are closed requests that require no action
- 4. For Submitted requests in the **Pending** status, select one or more pieces of equipment by clicking inside the checkbox of the first column.
 - a. Select the **Resend** button to send a reminder notice to the Grantor (Fleet Manager of another fleet). The request remains in **Pending** status.
 - b. Select the **Escalate** button to escalate your request to the Equipment Owner. The request moves to **Escalated** status.
 - c. Select the **Cancel Request** button to cancel the request. The request moves to **Closed** status.
- 5. The following options apply to all sections and statuses listed above:

- a. Initially tables are loaded with a collapsed amount of information about each piece of equipment. Select the **Expand/Collapse All** button to expand the details and use the bottom scroll bar to scroll over to view all columns. Use this button as a toggle to turn off the expanded details.
- b. Sort columns by selecting the column title. An ascending arrow appears. Select the column title again for descending and select it again to turn off sorting.
- c. Select the **Download to CSV** button to save the list to your computer.
- d. Filter on a column by hovering to the right of the column title. Select how you want to filter from the drop-down list and then enter your criteria. Select the **Clear Filters** button to clear all filters.

Appendix A. Adding OT-57 Contacts to FindUs.Rail

FindUs.Rail is a web-based centralized database that allows you to review and manage your company's contact information. It helps railroad departments, private equipment owners, and leasing companies stay connected and query contacts and agency relationships for industry functions and roles.

If you are a controlling entity who will be creating fleets in the Loading Authority (OT-57) application, you need to be setup in the FindUs.Rail database with your e-mail and phone number contact information. Within FindUs.Rail, there is a Loading Authority (OT-57) controlling entity contact type. If this contact information is not setup, then your controlling entity contact information will not be available for selection when your company's fleets are created. If you are not already registered in the FindUs.Rail contact database, go to https://public.railinc.com to request permission after establishing your SSO account. Refer to the *FindUs.Rail User Guide* for complete instructions on using the FindUs.Rail system.

Your setup in FindUs.Rail does not determine your privileges and what actions you can take within the Loading Authority OT-57 system; these are also determined by your SSO role. FindUs.Rail is simply used for your email contact information and to identify your role to others in the railroad industry. Every Loading Authority OT-57 controlling entity should be listed as a contact in FindUs.Rail.

Use the following procedure to add a Loading Authority OT-57 contact into FindUs.Rail.

Note: This procedure requires that you have set up a Railinc Single Sign-On (SSO) User ID and already have a FindUs.Rail account. See the notes in <u>Getting Started</u> to access information about SSO.

- 1. Go to <u>https://public.railinc.com</u> to login (see Logging In).
- 2. From the Launch Pad, in the My Applications section, select FindUs.Rail.
- 3. Once inside FindUs.Rail, select the **Contacts** menu, and then select the **Add Contact** link. The Add Contact page is displayed, with the **Contact** section at the top of the page and the **Categories** section at the bottom of the page.

Glossary

AAR—Association of American Railroads. The standard setting organization for North America's railroads.

CIF—Customer Identification File. Carriers use CIF codes to identify customer locations where price and other contract terms apply; to provide accurate delivery instructions; and to improve shipment reservation, booking, and equipment ordering processes.

CSM—Centralized Station Master. A geographic location file that contains data about North American rail and motor carrier point stations. Railroads use this file primarily to plan efficient freight movements from origin to destination.

IRF—Industry Reference Files. These are the North American railroad industry's official code tables that are used to ensure consistency in data interpretation and facilitate communication among industry partners.

FindUs.Rail—A web-based database of essential rail industry contacts that enables users to review and manage their contact information, enabling railroad departments, private car owners, and leasing companies to communicate effectively.

FSAC—Freight Station Accounting Code. A five-digit code assigned to a station.

Mark—A two-to-four-letter abbreviation for a railroad, shipper, lease agent, shop, etc.

SCAC—Standard Carrier Alpha Code. A two- to four letter code used to identify transportation companies.

SPLC—Standard Point Location Code. A six- to nine-digit numeric code used to specify the physical location of a station.

SSO—Single Sign-On. The portal for signing into various Railinc applications.

Umler—System for tracking the physical characteristics, transportation management, and pool assignments of virtually every piece of rail equipment in North America.
