Monitor Delivers Unmatched Visibility

Near Real-Time Exception Reporting

Whether you are tracking railcar shipments, intermodal shipments or equipment, RailSight Monitor gives you full rail visibility from a central source so you can quickly identify and act on issues before they have an impact on your operations.

Mapping capability provides unique, complete view of your equipment and shipment lifecycle

560 Tracking intermodal equipment and railcars on more than 560 rail carriers across North America

Easy Set Up for Faster ROI

Get up and running with RailSight Monitor in a matter of days with little to no additional IT support, enabling you to focus on managing your equipment and shipments. This puts you on the fast track for a return on your investment. A convenient, standalone resource, RailSight Monitor complements any enterprise-resource planning software.

Exception notifications keeps you current on equipment issues

Single source for largest aggregation of rail data

Custom Monitoring, Improved Results

RailSight Monitor's streamlined, customizable dashboard offers instant snapshots of your designated metrics and provides relevant real-time mapping and ad hoc reports without distracting clutter. You can move from a summary level to greater detail with direct drill-down capability, and you can see near real-time information to proactively manage shipments and equipment for better results.

Monitor Supports Critical Decisions

Built on the RailSight CLM engine by the leader in rail data for more than 30 years, RailSight Monitor supports mission-critical business decisions by providing complete, up-to-date and accurate location data so you can:

- Gain visibility into critical fleet information
- Quickly identify problem cars and shipments with exception reporting
- Track equipment for planning and fleet optimization
- Sort and filter data to focus on the information that's most important to you
- See the status of your equipment in a map or table view
