RailSight: Big Data, Actionable Insights

Most Comprehensive Data Source

RailSight Reports is the only rail business intelligence solution with access to the industry's most comprehensive source of interline rail data. Railinc has the data, technology and expertise to produce reports that deliver unique insights to help you manage your rail business more effecitvely and efficiently.

Consultative approach to understanding your business needs

560 Tracking intermodal equipment and railcars on more than 560 rail carriers across North America

The Data You Need, When You Need It

Get the data you need, when you need it with RailSight Reports. Whether you want a standard one-off report to help you make an informed buying or selling decision or a unique daily report on equipment health or railcar characteristics, Railinc consultants will work with you to customize your reports so you get the data you need to support your business decisions.

Customized Analytics Solutions

Railinc can deliver tailored solutions for unique rail logistics and equipment challenges. Our consultants will work hand in hand with you to understand your business needs and will leverage their in-depth industry knowledge, technology know-how and insight into Railinc's rail data sources to deliver customized analytics reports that create value for your business.

Customized reports deliver insights into your unique business challenges

Single source for largest aggregation of rail data

Gain Deep Insights into Rail Operations

Railinc can produce the following reports and more to deliver deep insights into your rail operations:

- Umler Special Reports aid with shipment planning, equipment maintenance and other critical tasks
- Cycle time reports help you measure equipment turnaround time to improve asset utilization
- Mileage reports can help you determine when, where and how your equipment has traveled
- Equipment health reports help you respond to safety and maintenance concerns and prioritize actions based on car location, alert level and load/empty status
